WELCOME TO MEPRAS 2025

It is with great excitement that we welcome you to MEPRAS Middle East 2025

craftsmanship, progress, and passion in Plastic, Reconstructive, and Aesthetic Surgery

This year's gathering is more than a scientific event — it's a hands-on journey through ten dynamic workshops, each curated to challenge, inspire, and elevate surgical performance and Aesthetic practice. From delicate facial procedures to complex microsurgical and Aesthetic techniques, MEPRAS is a space for those who believe in doing more than keeping up — it's for those who lead innovate, and refine their art with intention.

Thank you for joining a growing movement that values excellence over routine and precision over repetition. Let this experience be one that ignites ideas, forms lifelong connections, and takes your skill to the next level.

OUR VISION

MEPRAS exists to reshape the landscape of surgical education and

Aesthetic Practice in the Middle East — not by following global trends, but by setting them

We envision a future where regional surgeons are not just participants in global discourse but pioneers of it — developing original techniques, leading groundbreaking research, and mentoring the next wave of innovators

By anchoring education in real-time, high-impact training and surrounding it with mentorship, integrity, and curiosity, MEPRAS is building a legacy that extends far beyond the operating room one that transforms people, practices, and possibilities.

LIVERPOOL HANDS-ON FLEXOR TENDON SURGERY WORKSHOP

Level Of Difficulty

Beginner

Intermediate

THIS WORKSHOP WILL PROVIDE TRAINING ON TECHNICAL SKILLS REQUIRED TO PERFORM AN ADEQUATE FLEXOR TENDON SURGERY IN A PRACTICAL AND SMOOTH STEPWISE FASHION, USING SYNTHETIC MODELS AND DEVITALIZED ANIMAL TISSUES SIMULATING LIVE SURGERY

Target participants

- Junior Plastic Surgery Residents
- House officers interested in plastic surgery
- Specialists in Plastic Surgery
- Orthopaedics who want to refine their Operative skills in Hand surgery
- Specialists & Consultants who require basic plastic surgery skills

LIVERPOOL FLEXOR TENDON HANDS-ON WORKSHOP DAY 1 21st OF MAY

DESCRIPTION

This specialized workshop equips hand surgery trainees with essential skills in flexor tendon repair, a core procedure in all plastic surgery units. Utilizing synthetic models and devitalized animal tissues, the program delivers step-by-step training to simulate live surgery. Minimal lectures ensure maximum hands-on practice, allowing participants to refine their surgical dexterity and master fundamental techniques. Developed collaboratively by Ain Shams University and The University of Liverpool Hospitals in 2011, this workshop continues to enhance surgical expertise and optimize patient outcomes.

MICROSURGERY 101 WORKSHOP

THIS ONE-DAY HANDS-ON MICROSURGERY WORKSHOP EQUIPS BEGINNERS WITH ESSENTIAL KNOWLEDGE AND SKILLS FOR STARTING THEIR MICROSURGERY CAREERS. LEARN KEY CONCEPTS, INCLUDING MICROSCOPE HANDLING, USE OF SPECIALIZED INSTRUMENTS AND MICRO THREADS, MICRO SUTURING ON HIGH-QUALITY SIMULATORS. AT THE END OF THE DAY YOU SHOULD BE ABLE TO PERFORM SUCCESSFUL END-TO-END AND END-TO-SIDE VASCULAR ANASTOMOSIS.

TARGET PARTICIPANTS

- Plastic Surgery Trainees
- Vascular surgery Trainees
- Organ Transplant surgeons Trainees
- Orthopedics Trainees
- Cardiothoracic surgery Trainees

LEVEL OF DIFFICULTY

- Beginner

MICROSURGERY 101 WORKSHOP HANDS-ON WORKSHOP DAY 1 21st OF MAY

DESCRIPTION

This one-day, hands-on Microsurgery 101 Workshop is designed to provide you with the foundational skills and knowledge needed to begin your microsurgery career. Learn the essential concepts of handling your microscope for magnification, using specialized instruments and micro threads, performing micro suturing on high-quality synthetic simulators, and mastering end-to-end vascular anastomosis techniques.

Target Participants:

- Emerging Plastic Surgeons
- Aspiring Dermatologists
- Dentists & Maxillofacial Surgeons
- General practitioners with a passion for Aesthetic Medicine
- Specialists and Consultants from diverse disciplines

SAI
HANDS ON WORKSHOP
DAY 1 21st OF MAY

DESCRIPTION

This dynamic one-day workshop provides an exceptional opportunity for house officers and emerging aesthetic practitioners to cultivate essential skills in aesthetic injections at the outset of their careers. The course uniquely emphasizes hands-on training, offering a safe environment guided by leading experts in the aesthetic and anti-aging fields. Participants will leverage cutting-edge ultrasound technology—an innovative advancement in the industry—to enhance their practical experience and ensure the safety of every technique taught.

The curriculum covers a comprehensive range of topics, including anti-aging procedures, filler injections, neuromodulators, and the various aspects of facial aesthetics. Additionally, it highlights the integral role of lasers and devices in the anti-aging landscape. This workshop not only prepares trainees for more advanced

101 PERIPHERAL NERVE SURGERY HANDS ON WORKSHOP

DAY 2 22Nd OF MAY

DESCRIPTION

The success of peripheral nerve surgery relies on several key factors such as the level of trauma, timing of intervention, and, most importantly, the surgical techniques employed. This specialized workshop provides an exceptional learning platform for acquiring the latest knowledge and best practices in peripheral nerve surgery.

Participants will engage in hands-on sessions using animal models, simulating live surgery, and working with microscopes, magnifying loupes, and microsurgery instruments. These tools will help refine essential micro-neural skills in a practical, step-by-step manner.

FAT TRANSFER LAB & BEYOND HANDS-ON WORKSHOP

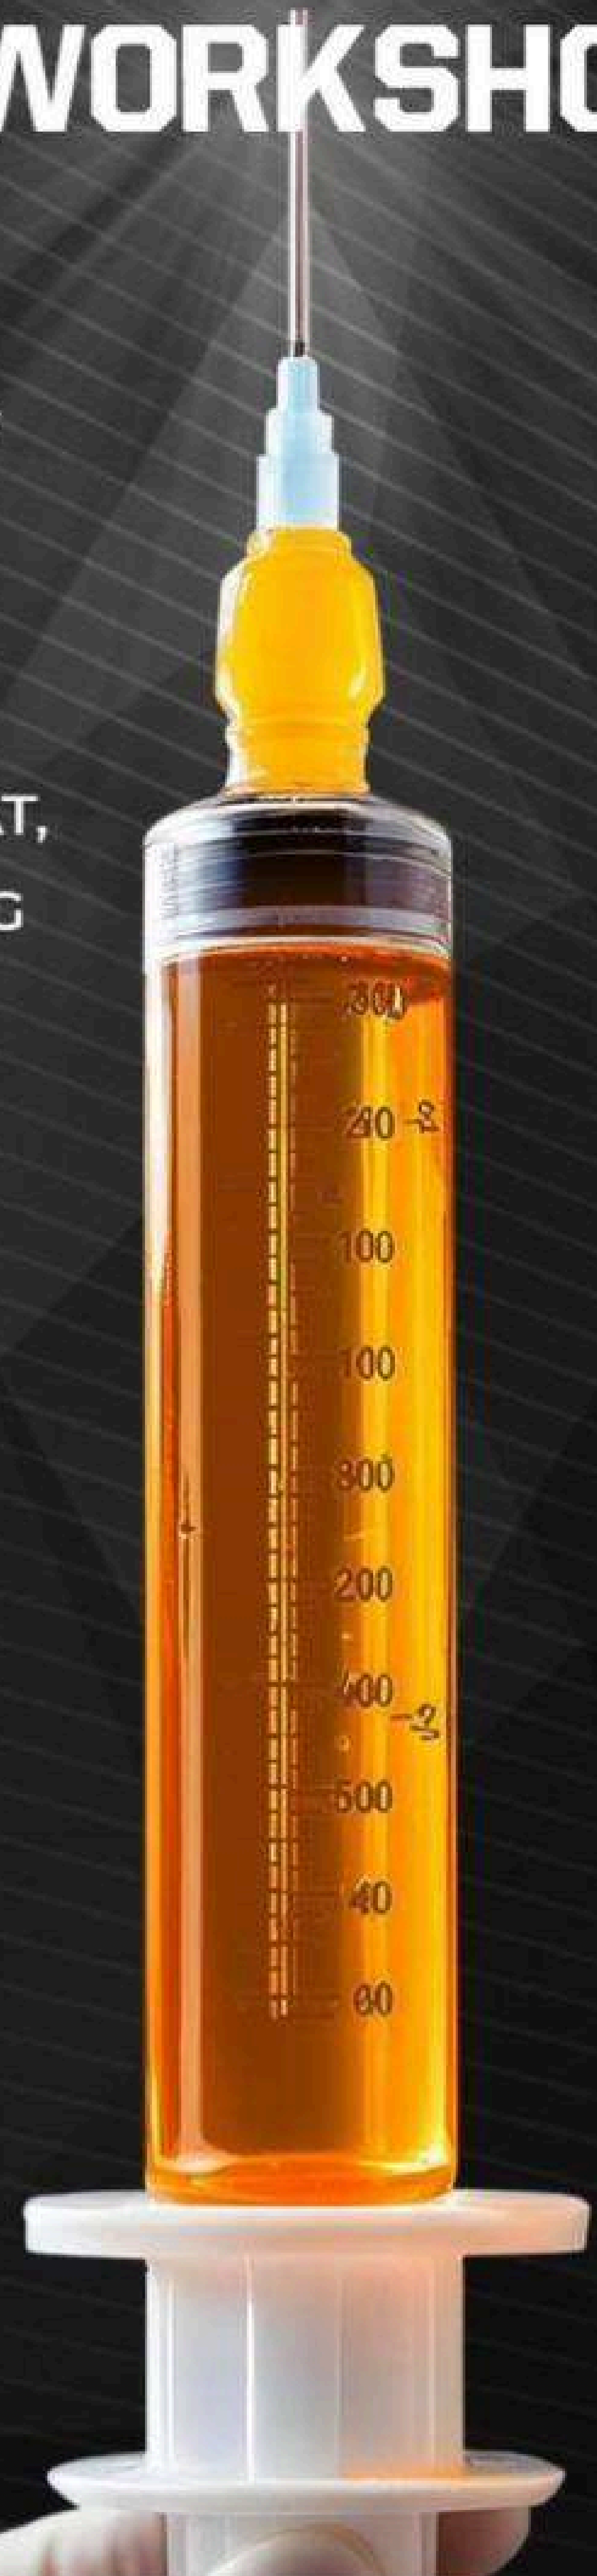

JOIN OUR HANDS ON WORKSHOP
HIGHLIGHTING THE SKILLS REQUIRED FOR
SUCCESSFUL FAT TRANSFER, COVERING EVERY
SINGLE STEP INCLUDING PROPER FAT
ASPIRATION TECHNIQUES AND IDENTIFYING
DIFFERENT ASPIRATION SITES. LEARN THE
PREPARATION OF BOTH MACRO AND NANO FAT,
ULTRASOUND MAPPING DURING FAT GRAFTING
AND PRECISE FAT INJECTION METHODS. THE
COURSE WILL ALSO EXPLORE DIFFERENT
APPLICATIONS OF FAT TRANSFER IN FACE,
BREAST AND BODY

Level Of Difficulty

Beginner | Intermediate

Target Participants:

- Junior Plastic Surgery Residents
- House officers interested in plastic surgery
- Specialists in Plastic Surgery

FAT TRANSFER LAB AND BEYOND HANDS ON WORKSHOP

DAY 2 22Nd OF MAY

DESCRIPTION

The surgical candidates are selected in order to provide a comprehensive demonstration of every detail of the surgical techniques

SURGERY

SURGEON

8:00-5:00PM

Deep Plane Face, Forehead, and Neck Lift + Lower Blepheroptasty

Holistic approach for the neck, face, Eyelid, Forehead to achieve Queen Nefertiti Neck using the safe Radiofrequency waves **Soniquence** device. It is an energy-based Radiofrequency device used instead of electrocautery to avoid collateral damage to delicate structures)

Ahmed Hweidi

8:00-5:00PM

Endoscopic Lateral Brow+Midface Lift + Upper Blepheroptasty

(designed to restore a scarless youthful, refreshed look. By lifting the brow and midface through tiny hidden incisions, it smooths fine lines, repositions sagging tissues, and enhances facial contours—all without visible scars)

Konstantinos Benetatos

Following the intensive Facelift Masterclass, participants will have the unique opportunity to witness a live surgery session where the latest facial rejuvenation techniques will be demonstrated in real time. The session will offer an in-depth look at the artistry and precision behind modern facelift procedures, with expert commentary explaining each step to achieve natural, harmonious results. It will be a true bridge from theory to practice, bringing advanced knowledge to life

8:00-5:00PM

Harmoni Kinetics Liposculpture

(The high Technology **VASER**: Vibration Amplication of Sound Energy at Resonance as well as the **LIPOMATIC** devices will be utilised during the surgery)

Huseyin Kandulu
Ahmed Taalab

Following the intensive HD Liposculpture Masterclass, participants will have the unique opportunity to witness a live surgery session where the latest techniques will be applied in real time. The session will offer an in-depth look at the artistry and precision behind dynamic body contouring, with expert commentary explaining each step to achieve natural, high-definition results . It will be a true bridge from theory to practice, bringing advanced knowledge to life

SURGEON

8:00-5:00PM

Structural Rhinoplasty

Mohammed Abdulmohsen

(The Piezo Technology by WoodPecker will be utilised during the surgery)

Following the hands-on rhinoplasty training session, participants will have the exclusive opportunity to observe a live rhinoplasty surgery performed by one of our expert faculty members . The procedure will showcase key techniques in both Aesthetic and Functional nasal surgery, with a focus on real-time problem solving, intraoperative strategy, and precision in execution. Attendees will gain invaluable insights into operative planning, and placement, tip refinement, and postoperative considerations.
